FOR IMMEDIATE RELEASE

MAIL BOSS™ Introduces Wall Mount Security Locking Mailboxes for Mail & Identity Theft Prevention

REDMOND, Washington (April 15, 2008) – In response to the epidemic of mail and identity theft, an innovative Seattle based company set out to change the way Americans receive their mail. In 2006, Epoch Design introduced the MAIL BOSS™, a high security locking curbside mailbox, as the first line of defense against identity theft. Mail must be protected at its source; the venerable paper shredder is only part of the solution. As people have become more vigilant about protecting their identities, Mail Boss sales have soared. To satisfy growing customer demands, Epoch Design has recently introduced the MAIL BOSS™ Wall Mount locking security mailbox, the only wall mount mailbox with true fortress-like security features.

“After the successful introduction of our MailBoss high security curbside mailbox, we were flooded with requests for a wall mount product with similar security features. We soon learned that not a single product was available in the marketplace that would give homeowners true mail security for wall mount mailboxes,” said David Bolles, president of Epoch Design, the manufacturer of the MAIL BOSS™ product line.

The MailBoss Wall Mount offers a high security choice for customers who choose to have a mail receptacle conveniently mounted on their home, condominium, or townhouse. Most “locking” mailboxes can be destroyed or opened in about 3 seconds, but the MailBoss Wall Mount touts the same high security features as the curbside model. Made of 14-gauge and 16-gauge galvanized powder-coated steel, the MailBoss Wall Mount features a patent-pending anti-pry positive door locking system with a brass core tube lock to foil even the most determined identity thieves.
“We incorporated the patent-pending anti-theft pin-latch locking system, heavy-duty steel, and the patented FAST-TRAK™ features from our curbside MailBoss so the homeowner could quickly and easily mount the unit and trust the mail would be secure,” Vice President John DeRaspe explained.

The MailBoss Wall Mount is available in black, granite, bronze and white in two attractive styles, the Metro and the Townhouse. For additional information on Epoch Design and the MAIL BOSS™ line, please call 1 (800) 589-7990 or visit them online at www.themailboss.com or www.epochbydesign.com.
